

Virtual Cockpit Operation *SARATOGA SP*

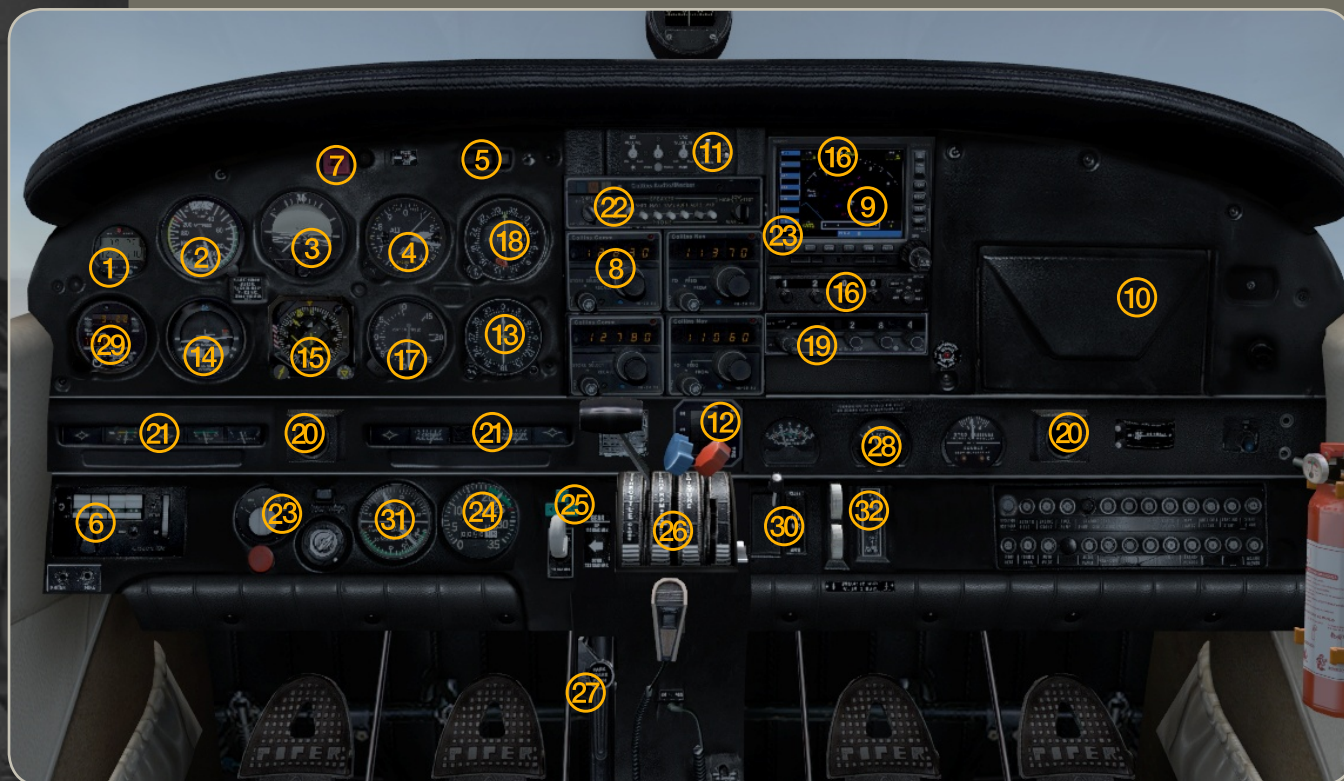

Flying a 300 HP aircraft requires a continue monitoring of many instruments and controlling the aircraft on every moment. This Saratoga SP VC was developed creating a very real experience as a pilot which allow you seeing many instruments as in the real aircraft.

Main instruments have pop up capability which helps viewing them even when you turn your head to see outside.

Highly detailed instruments and a smooth running in terms of FPS make this aircraft completely flyable from the VC, as in real life.

- 1.- Clock
- 2.- Airspeed
- 3.- Artificial horizon
- 4.- Altimeter
- 5.- Test Panel Anuntiator
- 6.- Autopilot Century III
- 7.- Gear warning light
- 8.- Comm1 & Nav1
- 9.- GPS
- 10.- Glove box
- 11.- Avionics & Gps/Nav Switch
- 12.- DME
- 13.- Adjust ADF
- 14.- Turn coordinator
- 15.- HSI
- 16.- Transponder
- 17.- Variometer
